3.	R171087	Kishore K

Overview

The project is related to campus placement cell, where it manages all the CDPC related activities and this will reduce the time and the communication gap between the CDPC and students. Students will get every bit of notification of the latest updates and through this website and each student have a flexible management system. Admin of this website gathers all the related information from the CDPC and update it on the website. Students get the status related to his application to the company through email. Students will be solved the FAQs through sending queries to the placement officer. Our main aim is to enhance all the features and providing a flexible environment to the students.
